

SUPPLY AND DELIVERY OF ICT EQUIPMENT FOR THE PBO OFFICE OF MINSU MAIN CAMPUS Name of Project

BAC Resolution Recommending Approval Resolution No. <u>055</u>, s. 2025

WHEREAS, the Mindoro State University (MinSU), through Bids and Awards Committee (BAC) has advertised in the PhilGEPS and MinSU Website the Request for Quotation (RFQ) No. 2025-047 for the project "Supply and Delivery of ICT Equipment for the PBO Office of MinSU Main Campus" with an Approved Budget for the Contract (ABC) amounting to Sixty Thousand Pesos (Php60,000.00);

WHEREAS, in response to the advertisement of the project, three (3) suppliers/bidders were found in the document request list, and three (3) suppliers/bidders in the name of KRISTWIN CONSUMER GOODS TRADING, PAPERCAT OFFICE SUPPLIES AND EQUIPMENT TRADING and QUIN TRADING submitted price quotation before the deadline;

WHEREAS, the detailed evaluation of price quotation resulted in the following:

Approved Budget for the Contract (ABC)	Name of Bidder	Price Quotation	
the Contract (ADO)	Kristwin Consumer Goods Trading	Php55,500.00	
Php60,000.00	Quin Trading	Php58,500.00	
	Papercat Office Supplies And Equipment Trading	Php59,701.00	

WHEREAS, the BAC examined and verified the price quotation submitted by the abovementioned suppliers and were found to be complying and responsive;

NOW, THEREFORE, BE IT RESOLVED that the BAC hereby recommends to the Head of Procuring Entity the approval of awarding the contract involving the project, "Supply and Delivery of ICT Equipment for the PBO Office of MinSU Main Campus" as follows:

 to Kristwin Consumer Goods Trading for being the supplier/bidder with the Lowest Calculated Responsive Bid (LCRB);

RESOLVED, this 25th day of March, 2025 at MinSU-Main Campus, Alcate, Victoria, Oriental Mindoro.

General Conditions

- 1. Quotations and other requirements stated below shall be submitted to the Bids and Awards Committee (BAC) Office, Mindoro State University -Main Campus, Alcate, Victoria, Oriental Mindoro, Philippines on the date and time stated in this RFP.
- Supplier shall submit the following requirements:
 - a. Duly signed original copy of Request for Quotation (RFQ). Prices shall be quoted in Philippine Pesos.
 - b. PhilGEPS Registration
 - Valid Mayor's/Business Permit
 - Omnibus Sworn Statement d.
 - BIR Certificate of Registration e.
 - f. Latest Income/Business Tax Return
 - TAX Clearance
 - h. DTI Registration/SEC Certificate
 - Original Brochures or certificates of the items offered showing its performance characteristics or specifications, if applicable

Price validity shall be 30 calendar days from the deadline of submission of quotation.

Ocular Inspection

Upon the decision of the End-User and BAC, the supplier and its concerned premises may be subjected to ocular inspection and approval by the End-User and/or TWG Inspections of the BAC prior to the award.

Award

The supplier that submitted the lowest calculated responsive quotation, and passed the inspection conducted by the End-User and BAC prior to the event, if any, shall be awarded the contract.

Evaluation of Quotations

Quotations shall be compared and evaluated of the basis of the following criteria:

- 1. Completeness of Submission
- Compliance with Item & Description Requirements
- 3. Price

Instructions

- 1. Supplier shall be responsible for the source(s) of its goods/services/equipment, and which shall be in accordance with the schedule and specifications of the RFQ or contract. Failure of the supplier to comply with this provision shall be ground for cancellation of the award or purchase order issued to the supplier.
- 2. Supplier that accepted an award, purchase order, or contract but failed to deliver the required goods/services/equipment within the time called for in the award, purchase order, or contract shall be disqualified from participating in MinSU or any of MinSU campuses future procurement activities. This is without prejudice to the imposition of other sanctions prescribed under R.A. 9184 and its IRR-A against the supplier.
- All duties, excise, and other taxes and revenue charges shall be paid by the supplier.
- All transactions are subject to withholding of credible Government Taxes per revenue regulation(s) of the Bureau of Internal Revenue

Liquidation Damages

A penalty of one-tenth of one percent (0.001) of the total value of the undelivered goods/services/equipment shall be charged as liquidated damages for every day of delay of the delivery of the purchased goods/services/equipment.

Warranty

Supplier warrants that all goods/services/equipment to be provided are of acceptable industry standard.

Payment

Payment shall be made only upon a certification by the Head of the Procuring Entity to the effect that the GOODS have been rendered or delivered in accordance with the terms of this Contract and have been duly inspected and accepted

Line of Business	RETAIL SALE OF CONSTRUCTION SUPPLIES, N.E.C.

REMINDERS:

1. An annual registration fee shall be paid upon registration and every year thereafter on or before the last day of January, using BIR Form No. 0605.

2. Filing of required tax return/s to conform with the above tax types, whether with or without business operation, to avoid penalties.

3. For new business registrants, application for registration of manual Books of Accounts (B/As) shall be before the deadline for filing of the initial quarterly income tax return or annual income tax return whichever comes earlier, from the date of registration. Registration of new set of manual B/As shall be before its use

4. Immediately inform the district office in case of transfer/cessation of business and other changes in

registration information by filing BIR Form No. 1905.

5. For Self-Employed Individuals (SEI) whose gross sales and/or receipts and other non-operating income does not exceed P3,000,000 and who opted to avail of the 8% Income tax rate, the tax type Percentage Tax (PT) shall not be reflected in the Certificate of Registration (COR). However, at the start of each taxable year, such SEI shall be automatically subjected to graduated income tax rates and required to file quarterly percentage tax return (BIR Form No. 2551Q) and option to replace the COR to reflect "PT", unless qualified and opted to avail of the 8% Income tax rate annually.

I hereby certify that the above named person is registered as indicated above, under the provision of the National Internal Revenue Code, as amended:

PROJECT PROPOSAL

Title : Procurement of All-in One Personal Computer

Implementing Agency : MINDORO STATE UNIVERSITY - Main Campus

Alcate, Victoria, Oriental Mindoro

Head of Agency: ENYA MARIE D. APOSTOL, Ph.D.

SUC President III

Contact Person: EDGARDO S. AGONCILLO

OIC-Director, Production and Business Operations

Total Project Cost:

₽ 60,000.00

Duration :

years / month(s)

Sources of Fund: Revolving Funds

Project Description

This project aims to equip the Production and Business Operations Unit of Mindoro State University with modern all-in-one (AIO) personal computers to enhance its capacity to facilitate the larger files, better cyber security and faster processing speed. The acquisition of these AIO PCs will address the limitations of the Unit's current reliance on a single laptop, streamline operations, improve production and work efficiency, and contribute to the University's mandated functions.

Introduction

In today's rapidly evolving digital landscape, the efficient and effective operation of any organization hinges significantly on its technological infrastructure. Mindoro State University, committed to providing quality education and fostering innovation, recognizes the critical role of technology in supporting its administrative and operational functions. The Production and Business Operations Unit serves as a vital arm of the University, responsible for producing essential stationery and documents that support academic, administrative, and outreach activities. In particular, the Unit will be responsible for printing stationery papers for undergraduate and graduate studies. Currently, the unit only has a laptop, which are not sufficient to meet the targeted level of production efficiency. The Unit's ability to deliver high-quality outputs in a timely manner directly impacts the University's overall efficiency and effectiveness.

Recognizing these challenges, this project proposes the acquisition of modern, all-in-one personal computers (PCs) equipped with the necessary software and peripherals to streamline the Unit's operations, enhance its capacity for high-quality document production, and contribute to the University's strategic goals. This initiative aligns with Mindoro State University's commitment to embracing technological advancements to improve its services and support its mission of providing excellent education and contributing to regional development.

Rationale

The Production and Business Operations Unit plays a crucial role in supporting the daily operations of Mindoro State University. The Unit is responsible for producing a wide range of essential materials, including stationery papers for undergraduate and graduate thesis/ studies manuscripts, I.D for students and employees of the university, administrative documents, forms, reports, and other documents.

The Unit currently relies on a single laptop to handle all of these responsibilities, which is inadequate. This leads to several problems such as; (1) Reduced Productivity, having a single laptop cannot efficiently handle the workload of the entire Unit, leading to delays in document production; (2) Increased Operational Cost, relying on a single device increases the risk of breakdowns and data loss, which can lead to costly repairs and recovery efforts; (3) Compromised

Quality, a laptop may not have the processing power or software capabilities to produce high-quality documents, especially those with complex formatting or graphics; and (4) Limited Capacity, the Unit's current infrastructure cannot handle large or complex printing jobs, forcing the University to outsource certain tasks at a higher cost.

Investing in new all-in-one personal computers will address these issues and significantly improve the Unit's efficiency and effectiveness. The new computers will provide faster processing speeds and modern software that will enable the Unit to produce high- quality documents more quickly and efficiently, and will be able to handle large and complex printing jobs, reducing the need for outsourcing.

This project supports gender and development by ensuring that all employees in the Production and Business Operations Unit, regardless of gender, have equal access to the new computers and training. The project will also ensure that the software used on the computers is gender-neutral and does not perpetuate gender stereotypes.

This investment in technology directly translates to enhanced productivity, cost savings, improved document quality, and a stronger overall operational capacity for the Production and Business Operations Unit.

Objectives

General Objectives

To enhance the productivity and efficiency of the Production and Business Operations Unit through the acquisition and implementation of modern, all-in-one personal computers.

Specific Objectives

- To procure one all-in-one personal computer
- To install and configure the new computers with the necessary software, including operating systems, office productivity suites, and graphic design software.
- To provide training to the Unit's personnel on the effective use of the new computers and software
- To improve the Unit's document production output.

Methodology

The project's objectives will be achieved through the following steps:

- Specification Development: Develop detailed specifications for the all-in-one personal computers, including processor speed, memory, storage capacity, screen size, and other relevant features.
- Procurement: Conduct a transparent and competitive bidding process to select a qualified vendor to supply the computers. Ensure compliance with all relevant procurement regulations and guidelines.
- Installation and Configuration: Install and configure the new computers with the necessary
 operating systems, software applications, and peripherals. Ensure that the computers are
 properly networked and connected to the University's network infrastructure.
- Training: Provide comprehensive training to the Unit's personnel on the effective use of the new computers and software. The training will cover basic computer operations, software applications, and troubleshooting techniques.
- Maintenance and Support: Establish a system for ongoing maintenance and support of the new computers, including regular software updates, virus protection, and technical assistance.

Expected Outputs and Outcomes Expected Outputs

- Procurement and delivery of new all-in-one personal computers.
- Installation and configuration of all necessary software and peripherals.
- Completion of training for the Unit's personnel.

Expected Outcomes

- Increased productivity and efficiency in the Production and Business Operations Unit.
- Improved quality of documents produced by the Unit.
- Reduced equipment maintenance and repair costs.
- A more comfortable and efficient working environment for the Unit's personnel.

Photo and Specification

Core Chipset: Intel® SoC Platform or equivalent
Processor at least Intel® Core? I5-12450H (8C (4P + 4E) / 12T, P-core 2.0 / 4.4Hz, E-core 1.5/3.3Ghz, 12MB
RAM: 8GB SO-DIMM DDR4-3200 (dual channel capablae, expandable up to 16GB)
Storage: 1TB SSD M.2 2280 Pcle® 4.0x4 NVMe®, expandable
Display: 23.8" FHD (1920x1080) IPS 250nits Anti-glare
Ports 2x USB 3.2 Gen 2, 2x USB 2.0, 1x HDMI, '1x power, '1x RJ-45 ethernet
Graphics: Integrated Intel® UHD Graphics
Connectivity: WLAN + Bluetooth Wi-Fi® 6, 802.11 ax 2x2 + BT5.2
OS: Windows 11 Home
Software: Office Home & Student 2021 or later version
Power Supply: at least 90W
Wireless keyboard
Bluetooth Mouse (BT-connection not Wi-Fi connection) with mousepad

Alignment with SDGs/RDP/PDP/University Mandate

This project aligns with the following Sustainable Development Goals (SDGs):

SDG 4: Quality Education: By improving the efficiency and effectiveness of the Production and Business Operations Unit, this project will contribute to the University's ability to provide quality education.

SDG 9: Industry, Innovation, and Infrastructure: This project promotes innovation by introducing new technology to the University's operations.

This project also aligns with the Philippine Development Plan (PDP) by supporting the government's efforts to promote technological innovation and improve the efficiency of government services. It supports the Regional Development Plan (RDP) by contributing to the economic development of the region through improved educational services. Furthermore, it supports the University's mandate to provide quality education and contribute to regional development.

Potential Impacts

The long-term impacts of this project include:

Improved Educational Quality: By supporting the University's administrative and operational functions, this project will contribute to improved educational quality.

Stronger Community Engagement: High-quality promotional materials will help the University to better engage with the community and promote its programs and services.

Target Beneficiaries

The primary beneficiaries of this project are:

- The Production and Business Operations Unit personnel, who will benefit from improved working conditions and increased efficiency.
- Students and faculty of Mindoro State University, who will benefit from higher-quality academic and administrative documents.
- The University as a whole, which will benefit from improved operational efficiency, enhanced image, and reduced costs.

Sustainability Plan

To ensure the long-term sustainability of this project, the following measures will be implemented:

- Regular preventive maintenance will be performed on the new computers to prevent breakdowns and extend their lifespan.
- The software on the computers will be regularly updated to ensure compatibility and security.
- Ongoing training will be provided to the Unit's personnel to ensure that they are able to use the computers effectively.
- The University's IT department will provide ongoing technical support to the Unit.

Work plan/ Ways Forward

After the purchase and integration of the all-in-one computer, the next step will involve expanding the scope of services offered by the PBO. This could include additional services such as document binding or digital document services. Moreover, the university will continue to evaluate the PBO's performance to identify new opportunities for enhancing student support services.

Project Description

This project aims to equip the Production and Business Operations Unit of Mindoro State University with modern all-in-one (AIO) personal computers to enhance its capacity to facilitate the larger files, better cyber security and faster processing speed. The acquisition of these AIO PCs will address the limitations of the Unit's current reliance on a single laptop, streamline operations, improve production and work efficiency, and contribute to the University's mandated functions.

Introduction

In today's rapidly evolving digital landscape, the efficient and effective operation of any organization hinges significantly on its technological infrastructure. Mindoro State University, committed to providing quality education and fostering innovation, recognizes the critical role of technology in supporting its administrative and operational functions. The Production and Business Operations Unit serves as a vital arm of the University, responsible for producing essential stationery and documents that support academic, administrative, and outreach activities. In particular, the Unit will be responsible for printing stationery papers for undergraduate and graduate studies. Currently, the unit only has a laptop, which are not sufficient to meet the targeted level of production efficiency. The Unit's ability to deliver high-quality outputs in a timely manner directly impacts the University's overall efficiency and effectiveness.

Recognizing these challenges, this project proposes the acquisition of modern, all-in-one personal computers (PCs) equipped with the necessary software and peripherals to streamline the Unit's operations, enhance its capacity for high-quality document production, and contribute to the University's strategic goals. This initiative aligns with Mindoro State University's commitment to embracing technological advancements to improve its services and support its mission of providing excellent education and contributing to regional development.

Rationale

The Production and Business Operations Unit plays a crucial role in supporting the daily operations of Mindoro State University. The Unit is responsible for producing a wide range of essential materials, including stationery papers for undergraduate and graduate thesis/ studies manuscripts, I.D for students and employees of the university, administrative documents, forms, reports, and other documents.

The Unit currently relies on a single laptop to handle all of these responsibilities, which is inadequate. This leads to several problems such as; (1) Reduced Productivity, having a single laptop cannot efficiently handle the workload of the entire Unit, leading to delays in document production; (2) Increased Operational Cost, relying on a single device increases the risk of breakdowns and data loss, which can lead to costly repairs and recovery efforts; (3) Compromised

Quality, a laptop may not have the processing power or software capabilities to produce high-quality documents, especially those with complex formatting or graphics; and (4) Limited Capacity, the Unit's current infrastructure cannot handle large or complex printing jobs, forcing the University to outsource certain tasks at a higher cost.

Investing in new all-in-one personal computers will address these issues and significantly improve the Unit's efficiency and effectiveness. The new computers will provide faster processing speeds and modern software that will enable the Unit to produce high- quality documents more quickly and efficiently, and will be able to handle large and complex printing jobs, reducing the need for outsourcing.

This project supports gender and development by ensuring that all employees in the Production and Business Operations Unit, regardless of gender, have equal access to the new computers and training. The project will also ensure that the software used on the computers is gender-neutral and does not perpetuate gender stereotypes.

This investment in technology directly translates to enhanced productivity, cost savings, improved document quality, and a stronger overall operational capacity for the Production and Business Operations Unit.

Objectives

General Objectives

To enhance the productivity and efficiency of the Production and Business Operations Unit through the acquisition and implementation of modern, all-in-one personal computers.

Specific Objectives

- To procure one all-in-one personal computer
- To install and configure the new computers with the necessary software, including operating systems, office productivity suites, and graphic design software.
- To provide training to the Unit's personnel on the effective use of the new computers and software
- To improve the Unit's document production output.

Methodology

The project's objectives will be achieved through the following steps:

- Specification Development: Develop detailed specifications for the all-in-one personal computers, including processor speed, memory, storage capacity, screen size, and other relevant features.
- Procurement: Conduct a transparent and competitive bidding process to select a qualified vendor to supply the computers. Ensure compliance with all relevant procurement regulations and guidelines.
- 3. Installation and Configuration: Install and configure the new computers with the necessary operating systems, software applications, and peripherals. Ensure that the computers are properly networked and connected to the University's network infrastructure.
- Training: Provide comprehensive training to the Unit's personnel on the effective use of the new computers and software. The training will cover basic computer operations, software applications, and troubleshooting techniques.
- Maintenance and Support: Establish a system for ongoing maintenance and support of the new computers, including regular software updates, virus protection, and technical assistance.

Expected Outputs and Outcomes Expected Outputs

- Procurement and delivery of new all-in-one personal computers.
- Installation and configuration of all necessary software and peripherals.
- Completion of training for the Unit's personnel.

Expected Outcomes

- Increased productivity and efficiency in the Production and Business Operations Unit.
- Improved quality of documents produced by the Unit.
- Reduced equipment maintenance and repair costs.
- A more comfortable and efficient working environment for the Unit's personnel.

Alignment with SDGs/RDP/PDP/University Mandate

This project aligns with the following Sustainable Development Goals (SDGs):

SDG 4: Quality Education: By improving the efficiency and effectiveness of the Production and Business Operations Unit, this project will contribute to the University's ability to provide quality education.

SDG 9: Industry, Innovation, and Infrastructure: This project promotes innovation by introducing new technology to the University's operations.

This project also aligns with the Philippine Development Plan (PDP) by supporting the government's efforts to promote technological innovation and improve the efficiency of government services. It supports the Regional Development Plan (RDP) by contributing to the economic development of the region through improved educational services. Furthermore, it supports the University's mandate to provide quality education and contribute to regional development.

Potential Impacts

The long-term impacts of this project include:

Improved Educational Quality: By supporting the University's administrative and operational functions, this project will contribute to improved educational quality.

Stronger Community Engagement: High-quality promotional materials will help the University to better engage with the community and promote its programs and services.

Target Beneficiaries

The primary beneficiaries of this project are:

- The Production and Business Operations Unit personnel, who will benefit from improved working conditions and increased efficiency.
- Students and faculty of Mindoro State University, who will benefit from higher-quality academic and administrative documents.
- The University as a whole, which will benefit from improved operational efficiency, enhanced image, and reduced costs.

Sustainability Plan

To ensure the long-term sustainability of this project, the following measures will be implemented:

- Regular preventive maintenance will be performed on the new computers to prevent breakdowns and extend their lifespan.
- The software on the computers will be regularly updated to ensure compatibility and
- Ongoing training will be provided to the Unit's personnel to ensure that they are able to use the computers effectively.
- The University's IT department will provide ongoing technical support to the Unit.

Work plan/ Ways Forward

After the purchase and integration of the all-in-one computer, the next step will involve expanding the scope of services offered by the PBO. This could include additional services such as document binding or digital document services. Moreover, the university will continue to evaluate the PBO's performance to identify new opportunities for enhancing student support services.

Project Description

This project aims to equip the Production and Business Operations Unit of Mindoro State University with modern all-in-one (AIO) personal computers to enhance its capacity to facilitate the larger files, better cyber security and faster processing speed. The acquisition of these AIO PCs will address the limitations of the Unit's current reliance on a single laptop, streamline operations, improve production and work efficiency, and contribute to the University's mandated functions.

Introduction

In today's rapidly evolving digital landscape, the efficient and effective operation of any organization hinges significantly on its technological infrastructure. Mindoro State University, committed to providing quality education and fostering innovation, recognizes the critical role of technology in supporting its administrative and operational functions. The Production and Business Operations Unit serves as a vital arm of the University, responsible for producing essential stationery and documents that support academic, administrative, and outreach activities. In particular, the Unit will be responsible for printing stationery papers for undergraduate and graduate studies. Currently, the unit only has a laptop, which are not sufficient to meet the targeted level of production efficiency. The Unit's ability to deliver high-quality outputs in a timely manner directly impacts the University's overall efficiency and effectiveness.

Recognizing these challenges, this project proposes the acquisition of modern, all-in-one personal computers (PCs) equipped with the necessary software and peripherals to streamline the Unit's operations, enhance its capacity for high-quality document production, and contribute to the University's strategic goals. This initiative aligns with Mindoro State University's commitment to embracing technological advancements to improve its services and support its mission of providing excellent education and contributing to regional development.

Rationale

The Production and Business Operations Unit plays a crucial role in supporting the daily operations of Mindoro State University. The Unit is responsible for producing a wide range of essential materials, including stationery papers for undergraduate and graduate thesis/ studies manuscripts, I.D for students and employees of the university, administrative documents, forms, reports, and other documents.

The Unit currently relies on a single laptop to handle all of these responsibilities, which is inadequate. This leads to several problems such as; (1) Reduced Productivity, having a single laptop cannot efficiently handle the workload of the entire Unit, leading to delays in document production; (2) Increased Operational Cost, relying on a single device increases the risk of breakdowns and data loss, which can lead to costly repairs and recovery efforts; (3) Compromised

Quality, a laptop may not have the processing power or software capabilities to produce highquality documents, especially those with complex formatting or graphics; and (4) Limited Capacity, the Unit's current infrastructure cannot handle large or complex printing jobs, forcing the University to outsource certain tasks at a higher cost.

Investing in new all-in-one personal computers will address these issues and significantly improve the Unit's efficiency and effectiveness. The new computers will provide faster processing speeds and modern software that will enable the Unit to produce high- quality documents more quickly and efficiently, and will be able to handle large and complex printing jobs, reducing the need for outsourcing.

This project supports gender and development by ensuring that all employees in the Production and Business Operations Unit, regardless of gender, have equal access to the new computers and training. The project will also ensure that the software used on the computers is gender-neutral and does not perpetuate gender stereotypes.

This investment in technology directly translates to enhanced productivity, cost savings, improved document quality, and a stronger overall operational capacity for the Production and Business Operations Unit.

Objectives

General Objectives

To enhance the productivity and efficiency of the Production and Business Operations Unit through the acquisition and implementation of modern, all-in-one personal computers.

Specific Objectives

- To procure one all-in-one personal computer
- To install and configure the new computers with the necessary software, including operating systems, office productivity suites, and graphic design software.
- To provide training to the Unit's personnel on the effective use of the new computers and software
- To improve the Unit's document production output.

Methodology

The project's objectives will be achieved through the following steps:

- Specification Development: Develop detailed specifications for the all-in-one personal computers, including processor speed, memory, storage capacity, screen size, and other relevant features.
- Procurement: Conduct a transparent and competitive bidding process to select a qualified vendor to supply the computers. Ensure compliance with all relevant procurement regulations and guidelines.
- 3. Installation and Configuration: Install and configure the new computers with the necessary operating systems, software applications, and peripherals. Ensure that the computers are properly networked and connected to the University's network infrastructure.
- Training: Provide comprehensive training to the Unit's personnel on the effective use of the new computers and software. The training will cover basic computer operations, software applications, and troubleshooting techniques.
- Maintenance and Support: Establish a system for ongoing maintenance and support of the new computers, including regular software updates, virus protection, and technical assistance.

Expected Outputs and Outcomes Expected Outputs

- Procurement and delivery of new all-in-one personal computers.
- Installation and configuration of all necessary software and peripherals.
- Completion of training for the Unit's personnel.

Expected Outcomes

- Increased productivity and efficiency in the Production and Business Operations Unit.
- Improved quality of documents produced by the Unit.
- Reduced equipment maintenance and repair costs.
- A more comfortable and efficient working environment for the Unit's personnel.

7.0	Presence of monitoring targets and indicators (possible scores: 0,1.0, 2.0) Does the project include gender equality targets and indicators to measure gender equality outputs and outcomes?	0			0	
8.0	Collection of sex-disaggregated data in the Monitoring and Evaluation plan (possible scores: 0,1.0, 2.0)	0			0	
9.0	Commitment of resources to address gender issues (max score: 2; each item or question, 1)	0	0	2	2	
9.1	is the project's budget allotment sufficient for gender equality promotion or integration? OR, will the project tap counterpart funds from other partners/cooperators/collaborators for its GAD efforts? (possible scores: 0,0.5, 1.0)			1		
9.2	Does the project have the expertise in promoting gender equality and women's empowerment? OR, does the project commit itself to investing project staff time in building capacities within the project to integrate GAD or promote gender equality? (possible scores: 0.0.5.1.0)			1		
10.0	Connection of the project to the University's GAD efforts (max score: 2; for each item or question, 0.67)	0	0.33	0.67	1	
10.1	women? (possible scores: 0, 0.33,0.67)			0.67		
10.2	Will the Project build on the initiatives or actions of other organizations nearby the University? (possible scores: 0, 0.33,0.67)	0				The project does not involved other organization
10.3	Does the Project have an exit plan that will ensure the sustainability of GAD efforts and benefits? (possible scores: 0, 0.33,0.67)		0.33			No clear exit plan that will ensure the sustainability of GAD efforts and benefits
OTAL GAD SCORE FOR THE PROJECT PROPOSAL (Add the scores for each of the eight elements.)					6.66	the proposal has promising GAD prospe with "conditional pass"

: Vead cooding - hac JOHN Ethymeti + [Signature above printed name of WGAD evaluator]

Gender-responsive Projects are those that substantively address gender issues identified through a gender analysis of sex-disaggregated data and gender-related information, or that successfully promote gender responsiveness among their funded projects.

Gender-sensitive Projects are those that recognize and acknowledge differences in roles, needs, and perspectives of women and men, possible asymmetries in their relationship, and the possibility that actions or interventions will have different effects on and results for women and men based on their gender, but do not actively seek to address these issues.

Interpretation of the GAD score

0-3.9 GAD is invisible in the project (needs GAD technical assistance).
 4.0-7.9 Proposed Project has promising GAD prospects (proposal earning a "conditional pass," pending identification of gender issue/s and strategies and activities to address these, and inclusion of the collection of sex--disaggregated data in the monitoring and evaluation plan).
 8.0-14.9 Proposed project is gender-sensitive (Project passes the GAD test).

15.0-20.0 Proposed Project is gender-responsive (the Proponent to be commended)

PROJECT PROPOSAL

Title

Procurement of All-in One Personal Computer

Implementing Agency

: MINDORO STATE UNIVERSITY - Main Campus

Alcate, Victoria, Oriental Mindoro

Head of Agency:

ENYA MARIE D. APOSTOL, Ph.D.

SUC President III

Contact Person:

EDGARDO S. AGONCILLO

OIC-Director, Production and Business Operations

Total Project Cost:

₽ 60,000.00

Duration Sources of Fund: years / month(s)

Revolving Funds

Project Description

This project aims to equip the Production and Business Operations Unit of Mindoro State University with modern all-in-one (AIO) personal computers to enhance its capacity to facilitate the larger files, better cyber security and faster processing speed. The acquisition of these AIO PCs will address the limitations of the Unit's current reliance on a single laptop, streamline operations, improve production and work efficiency, and contribute to the University's mandated functions.

Introduction

In today's rapidly evolving digital landscape, the efficient and effective operation of any organization hinges significantly on its technological infrastructure. Mindoro State University, committed to providing quality education and fostering innovation, recognizes the critical role of technology in supporting its administrative and operational functions. The Production and Business Operations Unit serves as a vital arm of the University, responsible for producing essential stationery and documents that support academic, administrative, and outreach activities. In particular, the Unit will be responsible for printing stationery papers for undergraduate and graduate studies. Currently, the unit only has a laptop, which are not sufficient to meet the targeted level of production efficiency. The Unit's ability to deliver high-quality outputs in a timely manner directly impacts the University's overall efficiency and effectiveness.

Recognizing these challenges, this project proposes the acquisition of modern, all-in-one personal computers (PCs) equipped with the necessary software and peripherals to streamline the Unit's operations, enhance its capacity for high-quality document production, and contribute to the University's strategic goals. This initiative aligns with Mindoro State University's commitment to embracing technological advancements to improve its services and support its mission of providing excellent education and contributing to regional development.

Rationale

The Production and Business Operations Unit plays a crucial role in supporting the daily operations of Mindoro State University. The Unit is responsible for producing a wide range of essential materials, including stationery papers for undergraduate and graduate thesis/ studies manuscripts, I.D for students and employees of the university, administrative documents, forms, reports, and other documents.

The Unit currently relies on a single laptop to handle all of these responsibilities, which is inadequate. This leads to several problems such as; (1) Reduced Productivity, having a single laptop cannot efficiently handle the workload of the entire Unit, leading to delays in document production; (2) Increased Operational Cost, relying on a single device increases the risk of breakdowns and data loss, which can lead to costly repairs and recovery efforts; (3) Compromised

Quality, a laptop may not have the processing power or software capabilities to produce high-quality documents, especially those with complex formatting or graphics; and (4) Limited Capacity, the Unit's current infrastructure cannot handle large or complex printing jobs, forcing the University to outsource certain tasks at a higher cost.

Investing in new all-in-one personal computers will address these issues and significantly improve the Unit's efficiency and effectiveness. The new computers will provide faster processing speeds and modern software that will enable the Unit to produce high- quality documents more quickly and efficiently, and will be able to handle large and complex printing jobs, reducing the need for outsourcing.

This project supports gender and development by ensuring that all employees in the Production and Business Operations Unit, regardless of gender, have equal access to the new computers and training. The project will also ensure that the software used on the computers is gender-neutral and does not perpetuate gender stereotypes.

This investment in technology directly translates to enhanced productivity, cost savings, improved document quality, and a stronger overall operational capacity for the Production and Business Operations Unit.

Objectives

General Objectives

To enhance the productivity and efficiency of the Production and Business Operations Unit through the acquisition and implementation of modern, all-in-one personal computers.

Specific Objectives

- To procure one all-in-one personal computer
- To install and configure the new computers with the necessary software, including operating systems, office productivity suites, and graphic design software.
- To provide training to the Unit's personnel on the effective use of the new computers and software
- To improve the Unit's document production output.

Methodology

The project's objectives will be achieved through the following steps:

- Specification Development: Develop detailed specifications for the all-in-one personal computers, including processor speed, memory, storage capacity, screen size, and other relevant features.
- Procurement: Conduct a transparent and competitive bidding process to select a qualified vendor to supply the computers. Ensure compliance with all relevant procurement regulations and guidelines.
- Installation and Configuration: Install and configure the new computers with the necessary
 operating systems, software applications, and peripherals. Ensure that the computers are
 properly networked and connected to the University's network infrastructure.
- Training: Provide comprehensive training to the Unit's personnel on the effective use of the new computers and software. The training will cover basic computer operations, software applications, and troubleshooting techniques.
- Maintenance and Support: Establish a system for ongoing maintenance and support of the new computers, including regular software updates, virus protection, and technical assistance.

Expected Outputs and Outcomes Expected Outputs

- Procurement and delivery of new all-in-one personal computers.
- Installation and configuration of all necessary software and peripherals.
- Completion of training for the Unit's personnel.

Expected Outcomes

- Increased productivity and efficiency in the Production and Business Operations Unit.
- Improved quality of documents produced by the Unit.
- Reduced equipment maintenance and repair costs.
- A more comfortable and efficient working environment for the Unit's personnel.

Alignment with SDGs/RDP/PDP/University Mandate

This project aligns with the following Sustainable Development Goals (SDGs):

SDG 4: Quality Education: By improving the efficiency and effectiveness of the Production and Business Operations Unit, this project will contribute to the University's ability to provide quality education.

SDG 9: Industry, Innovation, and Infrastructure: This project promotes innovation by introducing new technology to the University's operations.

This project also aligns with the Philippine Development Plan (PDP) by supporting the government's efforts to promote technological innovation and improve the efficiency of government services. It supports the Regional Development Plan (RDP) by contributing to the economic development of the region through improved educational services. Furthermore, it supports the University's mandate to provide quality education and contribute to regional development.

Potential Impacts

The long-term impacts of this project include:

Improved Educational Quality: By supporting the University's administrative and operational functions, this project will contribute to improved educational quality.

Stronger Community Engagement: High-quality promotional materials will help the University to better engage with the community and promote its programs and services.

Target Beneficiaries

The primary beneficiaries of this project are:

- The Production and Business Operations Unit personnel, who will benefit from improved working conditions and increased efficiency.
- Students and faculty of Mindoro State University, who will benefit from higher-quality academic and administrative documents.
- The University as a whole, which will benefit from improved operational efficiency, enhanced image, and reduced costs.

Sustainability Plan

To ensure the long-term sustainability of this project, the following measures will be implemented:

- Regular preventive maintenance will be performed on the new computers to prevent breakdowns and extend their lifespan.
- The software on the computers will be regularly updated to ensure compatibility and security.
- Ongoing training will be provided to the Unit's personnel to ensure that they are able to use the computers effectively.
- The University's IT department will provide ongoing technical support to the Unit.

GAD

Work plan/ Ways Forward

After the purchase and integration of the all-in-one computer, the next step will involve expanding the scope of services offered by the PBO. This could include additional services such as document binding or digital document services. Moreover, the university will continue to evaluate the PBO's performance to identify new opportunities for enhancing student support services.
